This thesis describes the result of the research about Analysis the Activity of Regional Financial Arrangement Official (PPK-SKPD) in Bandar Lampung. This research is done based on the problem of the low activity of PPK-SKPD in Bandar Lampung.

Revealing and analysing that problem by using the study of government’s financial policy that is seen from the aspects of communication, resources, official attitude, and bureaucracy structure. The method is explanatory survey with data gaining technique through literary and outdoor study (observation, interview, and questionnaire). Sampling uses Proportional Random Sampling that get 54 samples which was distributed to 40 PPK-SKPD, then the data was analysed by using the double regression binary.

The result of the research shows that the activity of PPK-SKPD in Bandar Lampung which is seen from communication, resources, official attitude, and bureaucracy structure aspects in the implementation of Minister for Internal Affairs’s Policy number:13 2006 is on the positive category so that become influential towards PPK-SKPD activity in Bandar Lampung. This matter is supported also by the result of statistic examination that (1) Communication in the implementation of Minister for Internal Affairs’s Policy number:13 2006 is significantly influential towards PPK-SKPD activity (2) Resources in the implementation of Minister for Internal Affairs’s Policy number:13 2006 is significantly influential towards PPK-SKPD activity (3) Official Attitude in the implementation of Minister for Internal Affairs’s Policy number:13 2006 is significantly influential towards PPK-SKPD activity (4) Bureaucracy structure in the implementation of Minister for Internal Affairs’s Policy number:13 2006 is significantly influential towards PPK-SKPD activity. And, by T and F examination with 95% reliability both simultaneous and partial, the implementation of Minister for Internal Affairs’s Policy number:13 2006 is significantly influential towards PPK-SKPD activity in Bandar Lampung.
Therefore, theoretical and empirical evidence show that there are positive influence of communication, resources, official attitude, and bureaucracy structure in the implementation of Minister for Internal Affairs’s Policy number:13 2006 is significantly influential towards PPK-SKPD activity in Bandar Lampung. For this reason, it is suggested that the elevation of PPK_SKPD should be appropriate to the educational background. The improvement of human resources through education and training is also needed in accordance with their duties. And, the socialization of the policy should be done after Regional Budget (APBD) is legitimized.
